

Wiresoft Helps Lawyers Spend More Time on Clients, Less on Spam

Problem:

Anderson Hunter Law Firm represents many large corporations and local municipalities. The firm is a full-service law firm, with attorneys who provide a broad range of litigation and transaction services to their clients. Anderson Hunter has endured and grown because they have successfully and consistently adapted the tradition of hard work and quality service to contemporary circumstances.

Two years ago network threats became an ongoing challenge; mainly spam but also viruses, spyware, and phishing scams. As most solutions address only one problem, and to avoid the decision to purchase point solutions or completely outsourcing their technology, they decided that they needed a security platform that was flexible enough to handle the wide range of potential intrusions. After an extensive evaluation of several options, their IT consultant suggested and implemented the Wiresoft Sentry Security Platform.

How Wiresoft Solved the Problem:

“We figured the Sentry stops about 3,000 spam emails a week. Spam was a huge clog in our artery until we installed the Sentry.” Anderson’s network would slow down and the users were spending time marking emails as spam. The Sentry was installed in bridge mode in front of their exchange server and they have kept Norton for the added layer of protection.

“Sentry installed seamlessly within our infrastructure. I felt that too many infrastructure changes could cause problems so we decided to run the Sentry in bridge mode with the existing firewall. It is stopping Spam and we are completely happy with the Sentry!” Stephen Peterson, IT director

About the Wiresoft Sentry Security Platform:

Wiresoft Net, Inc. is a leading provider of network security solutions specifically designed for small- and mid-sized businesses. The Sentry Security Platform is a four-in-one problem solver, offering complete protection and freedom from business interruption with an impenetrable firewall, anti-virus defense, spam blocking and VPN connectivity. Built upon proprietary artificial intelligence technology, the Sentry Security Platform monitors your incoming and outgoing traffic 24/7/365, while continuously performing automatic virus and system updates. The complete, multifunctional and expandable enterprise-level network protection ensures your network remains healthy and secure, all the time.

The Sentry Security Platform has undergone rigorous performance testing by The Tolly Group, the IT industry’s leader in software and hardware evaluation. A downloadable report of the professional assessment is available at www.tollygroup.com or on the Wiresoft Internet web site. For more information about Wiresoft Net, Inc. and the Sentry Security Platform, visit www.wiresoft.net or call us toll-free at 866-333-4567.
