

TIZ DOORS

Wiresoft Delivers Bottom Line Profit to a Door Manufacturer

The Problem:

This Everett, WA company manufactures pre-hung doors, millwork, stair systems and door hardware. Typically, they received from two to five Requests for Proposal on door contracts in the Northwest Region of the U.S. They had been experiencing significant network downtime when computers became infected with viruses received through email. This was occurring at least 2-3 times a year and each virus attack would shut them down for at least one day and in a particularly bad attack, for four days. This problem impacted their ability to quickly respond to the needs of their customers in a timely manner.

The Wiresoft Solution:

With the installation of the Wiresoft Sentry Professional Security Platform, this problem has not returned. Since the date of install, the Sentry has stopped over 600 infected emails from entering their network. One of the things they loved most about the Sentry was that the employees did not even know that a new platform had been installed. It installed seamlessly and transparently. And, the Sentry stopped a particularly nasty virus less than 12 hours of installation and that very next day, Tiz successfully bid on a project that delivered \$10,000 of profit to the company.

“We figured the one virus we caught right after the Sentry installation delivered about \$10,000 in profit to the company. So every time the Sentry stops just one virus, we have saved money, increased productivity, and delivered more profit to the company!”

Victor Timmons – Tiz Doors IT consultant

About the Wiresoft Sentry Security Platform:

Wiresoft Net, Inc. is a leading provider of network security solutions specifically designed for small- and mid-sized businesses. The Sentry Security Platform is a four-in-one problem solver, offering complete protection and freedom from business interruption with an impenetrable firewall, anti-virus defense, spam blocking and VPN connectivity. Built upon proprietary artificial intelligence technology, the Sentry Security Platform monitors your incoming and outgoing traffic 24/7/365, while continuously performing automatic virus and system updates. The complete, multifunctional and expandable enterprise-level network protection ensures your network remains healthy and secure, all the time.

The Sentry Security Platform has undergone rigorous performance testing by The Tolly Group, the IT industry's leader in software and hardware evaluation. A downloadable report of the professional assessment is available at www.tollygroup.com or on the Wiresoft Internet web site.
